Hi Gary,

Here is a link to the letter I mentioned on the call today. <https://cfpub.epa.gov/adi/pdf/adi-nsps-0000028.pdf>

Hi Gary,

I am leaving for vacation but Pat will follow up with you tomorrow or next week. Thanks so much!

**Subject:** Pyrolysis Applicability Question

Hi Susan,

Sorry I wasn't able to speak with you today. I am available Friday and most of next week if you and Pat B. would like to talk.

Just some brief background from my end on this project – a few weeks ago, Mike Skroski (of Alternative Energy Solutions) and Richard Geisser (of Re-Energy, which runs a facility in Epping, NH that sorts construction and demolition materials) came in to discuss potentially constructing a facility (on the Re-Energy property) that would convert the wood portion of the C&D into a few products: a bio-oil, a bio-gas, and possibly carbon black. This would be accomplished through (what they claim is) a pyrolysis process. Apparently, there is a facility currently operating in TN that uses the pyrolysis technology that they plan to utilize here.

We told them they should seek a determination from EPA on the pyrolysis question. I had envisioned something along the lines of the attached letter, assuming they provided enough detail in their submittal (which I have not seen).

Gary
